

# Heat Pump Rebate for URE Consumer-Members

**\$600**  
DUAL-FUEL  
HEAT PUMP  
REBATE

URE is offering rebates to cooperative members who install a new dual-fuel heat pump for heating and cooling in a home, office, or other building.

A heat pump is an energy-efficient system designed to provide year-round comfort in your home. In the winter, the heat pump provides warm, comfortable heat. In the summer, it becomes a central air conditioner, extracting heat from inside your home and pumping it outdoors.

This rebate is available only to consumer-members. Members must install the ENERGY STAR®-qualified equipment between July 1, 2020 and June 30, 2021.

**SPECIFIC REQUIREMENTS:** The heat pump must be a central or ductless mini-split system meeting current minimum federal appliance efficiency standards. The installer must be a dealer approved by the cooperative. All rebates are issued in the form of a credit to the member's electric account. A maximum of two rebates may be paid per residential member home.

URE's rebate on dual-fuel heat pumps is limited. The offer expires when funds are depleted on a first-come, first-served basis, or when the program is discontinued.

*Rebate offered in partnership with*
