

# COMMON [QUESTIONS]

For just

\$2  
PER  
MONTH

**Why should I participate?**

The EnviroWatts program gives you a chance to show your support for energy generated from renewable sources – sources such as wind, bio-digesters on animal farms and waste gas from landfills that might normally just be flared into the atmosphere. If producing electricity from renewable energy sources is important to you, EnviroWatts provides an easy, inexpensive way to show you care.

**Can one person really make a difference?**

Absolutely! We've seen the EnviroWatts program grow because concerned cooperative members value the environment and want to ensure a more diversified energy future for their children and grandchildren.

**Will the power be delivered to my home or business?**

The electricity generated for the EnviroWatts program goes into the power grid and not directly to your home or business.

**What are the sources of energy for the EnviroWatts program?**

Renewable sources come from an ever-changing energy portfolio including wind, bio-digesters on farms and landfill methane gas, some of which are produced right here in Ohio. Electric power produced from a variety of renewable sources is purchased on behalf of the Ohio co-ops for this program.

**Can I change or cancel my participation if I change my mind?**

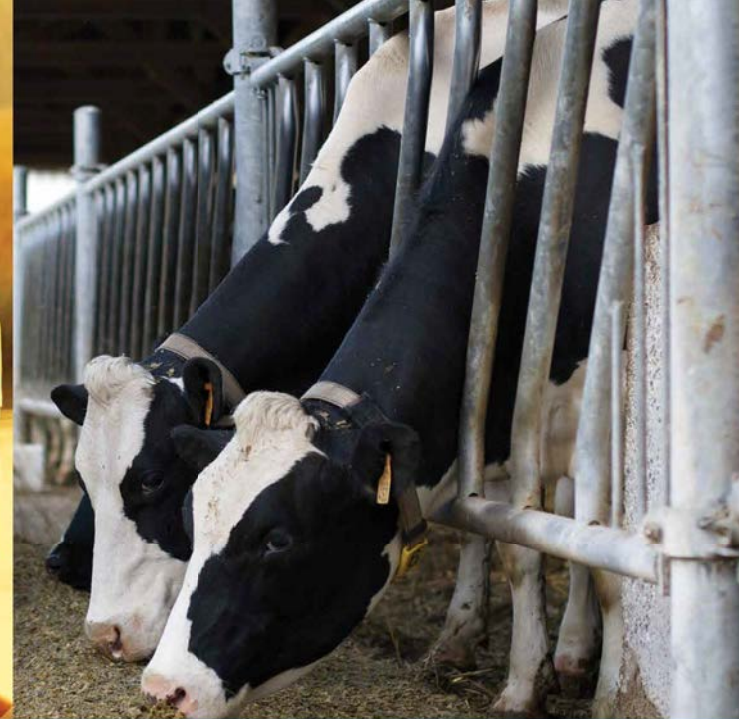

Yes. You can add blocks or cancel your participation at any time.

**Can businesses participate?**

They certainly can, and do! There's also a bulk purchase program for businesses which want to show their support in a big way.

you can help your cooperative invest in a renewable energy future.

## EnviroWatts Enrollment Form

I want to support renewable energy. Please enroll me in the EnviroWatts program. I will pay the additional charge of \$2 per 100 kilowatt-hour block each month on my electric bill in the quantity indicated below.

- 1 block for \$2/month
- 2 blocks for \$4/month
- 3 blocks for \$6/month
- \_\_\_\_ blocks at \$2/block/month

\_\_\_\_\_  
NAME ON ELECTRIC BILL

\_\_\_\_\_  
MAILING ADDRESS

CITY STATE ZIP

( ) -

\_\_\_\_\_  
PHONE

\_\_\_\_\_  
EMAIL ADDRESS

\_\_\_\_\_  
ACCOUNT NUMBER (IF KNOWN)

\_\_\_\_\_  
SIGNATURE

Thank you!  
Please return this form to your cooperative.

*If you wish to purchase more than 25 blocks of EnviroWatts per month, contact us for pricing.*

## THINK [DIVERSITY]

EnviroWatts is a green power program for Ohio's electric cooperative members that lets you support production of electricity from renewable sources.

Renewable energy added to the mix of conventional generation lessens pressure on non-renewable fuel sources and helps make us more independent.

But renewable sources are not a substitute for what is known as base load generation. Renewable power may not produce electricity on a continual basis, but rather on an intermittent basis, as is the case with wind power. It takes a combination of resources to adequately address our energy needs.

## THINK [FORWARD]

Electricity is available at the flick of a switch. It helps power our lives in many ways.

That's why it's important we use energy efficiently — insulating our homes, sealing cracks and holes where air escapes, and replacing inefficient appliances with energy-saving ones.

Energy is vital to our country and the world. We must not waste it, regardless of its source. Our future depends on this.

EnviroWatts, when paired with a complete home energy audit to maximize energy efficiency, is a terrific way to invest in our energy future while getting the most out of today's forms of electricity generation.

## THINK [INNOVATION]

The future of energy production is changing, with an increased focus on incorporating renewable sources.

But not everyone has the money, resources or ability to install a wind generator in their back yard or solar panels to their roof. EnviroWatts is there to help. It lets you support energy produced from renewable sources inexpensively.

When you participate in EnviroWatts your money helps purchase energy produced from renewable sources for the program. Consider being a part of the EnviroWatts program. Help your cooperative invest in a renewable energy future.
